

Guidelines for the financial support for patient care

1. In the month of March- April, DJST will announce the extent of financial support it wishes to offer for patient care.
2. The Head of the Departments are requested to submit their requisites along with approximate budget.
3. The requests will be placed in the trustees meeting and a review committee will be appointed.
3. A review committee will scrutinize the applications and decide which departments to be given the financial aid and to what extent. A general rule is that the departments given support in the previous year are not considered eligible. This is mainly to extend aid to all the departments at least once in 2 years.
4. The HOD will be communicated the decision of the review committee in the month of June.
5. Following this, the usual procedure for purchase of consumables/ equipment should be followed.
