

## BRAIN PROSECTION GOALS

### SESSION I - Membranes of the Brain

<b>Introduction</b>	<b>Self-study</b>
<ul style="list-style-type: none"><li>• Types of nerve cells</li><li>• Parts of brain</li></ul> <p style="text-align: center;"><b>Prosection</b></p> <ul style="list-style-type: none"><li>• Dura, arachnoid &amp; pia mater</li><li>• Dural folds, venous sinuses</li><li>• Subarachnoid cisterns</li><li>• Cerebello-medullary cistern (cisterna magna)</li><li>• Interpeduncular cistern</li><li>• Cisterna pontis</li><li>• Cisterna ambiens</li></ul>	<ul style="list-style-type: none"><li>• Attachments and venous sinuses in relation to<ul style="list-style-type: none"><li>• Falx cerebri</li><li>• Tentorium cerebelli</li><li>• Falx cerebelli</li><li>• Diaphragma sellae</li></ul></li><li>• Nerve supply of meninges of<ul style="list-style-type: none"><li>• Anterior middle and posterior cranial fossae</li></ul></li><li>• Subarachnoid cisterns</li><li>• CSF circulation</li><li>• Cisternal puncture</li></ul>

#### Diagrams to be drawn

- Meninges of brain
- Transverse section of spinal cord through upper cervical region

**SESSION II – Blood Vessels of Brain and Base of Brain**

<b>Prosection</b>	<b>Self-study</b>
<p><b>Circle of Willis:</b></p> <ul style="list-style-type: none"> <li>• Internal carotid arteries</li> <li>• Anterior cerebral arteries</li> <li>• Anterior communicating artery</li> <li>• Posterior communicating arteries</li> <li>• Posterior cerebral arteries</li> </ul> <p><b>Other arteries:</b></p> <ul style="list-style-type: none"> <li>• Basilar artery</li> <li>• Anterior choroidal arteries</li> <li>• Middle cerebral arteries</li> <li>• Vertebral arteries</li> <li>• Superior cerebellar arteries</li> <li>• Anterior inferior cerebellar arteries</li> <li>• Posterior inferior cerebellar arteries</li> <li>• Anterior &amp; posterior spinal arteries</li> </ul> <p><b>Base of brain</b></p> <ul style="list-style-type: none"> <li>• Cerebral peduncles</li> <li>• Optic chiasma</li> <li>• Tuber cinereum</li> <li>• Interpeduncular fossa</li> <li>• Mammillary bodies</li> <li>• Posterior perforated substance</li> <li>• Anterior perforated substances</li> <li>• Superficial attachment of all cranial nerves</li> </ul>	<p>Origin, course, branches and areas of distribution of</p> <ul style="list-style-type: none"> <li>• Internal carotid artery</li> <li>• Vertebral artery</li> <li>• Basilar artery</li> </ul> <p>Formation and applied anatomy of circle of Willis            Venous drainage of brain            Collateral circulation in case of block in</p> <ul style="list-style-type: none"> <li>• Internal carotid artery</li> <li>• Vertebral artery</li> </ul> <p>Subclavian steal syndrome</p>

**Diagrams to be drawn**

- Blood vessels of the brain
- Distribution of blood supply on superolateral, medial and inferior surface of cerebral hemisphere
- T S of Medulla oblongata at pyramidal decussation

**SESSION III – Hindbrain: Medulla oblongata and Pons**

<b>Prosection</b>	<b>Self-study</b>
<p><b>Medulla oblongata</b></p> <p>External surface</p> <ul style="list-style-type: none"> <li>• Anterior median fissure</li> <li>• Posterior median sulcus</li> <li>• Pyramid</li> <li>• Olive</li> <li>• Inferior cerebellar peduncles</li> <li>• Fasciculus gracilis &amp; gracile tubercle</li> <li>• Fasciculus cuneatus &amp; cuneate tubercle</li> <li>• Foramen caecum</li> <li>• Attachments of IX, X, XI, XII cranial nerves</li> </ul> <p><b>Pons</b></p> <p>External surface</p> <ul style="list-style-type: none"> <li>• Basilar sulcus</li> <li>• Transverse fibres</li> <li>• Middle cerebellar peduncles</li> <li>• Attachments of V, VI, VII, VIII cranial nerves</li> </ul>	<ul style="list-style-type: none"> <li>• To draw and label transverse sections of medulla oblongata through               <ul style="list-style-type: none"> <li>➤ Pyramidal decussation</li> <li>➤ Sensory decussation</li> <li>➤ Mid-olivary level</li> </ul> </li> <li>• To draw and label transverse sections of pons through               <ul style="list-style-type: none"> <li>➤ Facial colliculi</li> <li>➤ Upper pontine level</li> </ul> </li> <li>• Nuclei of origin, functional components, course and distribution of:               <ul style="list-style-type: none"> <li>➤ Oculomotor nerve (III cranial nerve)</li> <li>➤ Trochlear nerve (IV cranial nerve)</li> <li>➤ Trigeminal nerve (V cranial nerve)</li> <li>➤ Abducent nerve (VI cranial nerve)</li> <li>➤ Facial nerve (VII cranial nerve)</li> <li>➤ Vestibulo-cochlear nerve (VIII cranial Nerve) (Auditory pathway)</li> <li>➤ Glossopharyngeal nerve (IX cranial nerve)</li> <li>➤ Vagus nerve (X cranial nerve)</li> <li>➤ Accessory nerve (XI cranial nerve)</li> <li>➤ Hypoglossal nerve (XII cranial nerve)</li> </ul> </li> </ul>

**Diagrams to be drawn**

- T S of Medulla oblongata at sensory decussation
- T S of Medulla oblongata at mid-olivary level
- T S of pons at facial colliculus

**SESSION IV–Cerebellum, Fourth Ventricle, Midbrain**

Prosection	Prosection
<p><b>Cerebellum</b></p> <ul style="list-style-type: none"> <li>• Superior vermis</li> <li>• Inferior vermis</li> <li>• Vallecula of cerebellum</li> <li>• Floccullo-nodular lobe</li> <li>• Superior medullary velum</li> <li>• Inferior medullary velum</li> <li>• Fissura prima</li> <li>• Horizontal fissure</li> <li>• Postero-lateral fissure</li> <li>• Cerebellar cortex - layers</li> <li>• Arbor vitae cerebelli</li> <li>• Superior cerebellar peduncle</li> <li>• Middle cerebellar peduncle</li> <li>• Inferior cerebellar peduncle</li> <li>• Deep intracerebellar nuclei (especially dentate nucleus)</li> </ul> <p><b>Fourth ventricle</b></p> <p>Roof</p> <ul style="list-style-type: none"> <li>• Median and lateral apertures</li> <li>• Median dorsal, lateral dorsal and lateral recesses</li> <li>• Tela choroidea and choroid plexus of fourth ventricle</li> </ul> <p>Floor of fourth ventricle</p> <ul style="list-style-type: none"> <li>• Stria medullaris</li> <li>• Median sulcus</li> <li>• Medial eminence</li> <li>• Facial colliculus</li> <li>• Superior and inferior fovea</li> <li>• Sulcus limitans</li> <li>• Locus coeruleus</li> <li>• Hypoglossal triangle</li> <li>• Vagal triangle</li> <li>• Vestibular area</li> </ul>	<p><b>Midbrain</b></p> <ul style="list-style-type: none"> <li>• Tectum</li> <li>• Superior and inferior colliculi</li> <li>• Brachium of superior colliculus</li> <li>• Brachium of inferior colliculus</li> <li>• Cerebral peduncles</li> <li>• Crus cerebri</li> <li>• Substantia nigra</li> <li>• Tegmentum</li> </ul> <p style="text-align: center;"><b>Self-study</b></p> <ul style="list-style-type: none"> <li>• Fissures &amp; lobes of cerebellum, functional &amp; developmental divisions of cerebellum</li> <li>• Cerebellar cortical architecture <ul style="list-style-type: none"> <li>▪ Purkinje cell</li> <li>▪ Cerebellar glomerulus</li> </ul> </li> <li>• Cerebellar nuclei</li> <li>• Connections &amp; functions of cerebellum</li> <li>• Attachments, functional tracts in <ul style="list-style-type: none"> <li>▪ Inferior Cerebellar peduncle</li> <li>▪ Middle cerebellar peduncle</li> <li>▪ Superior Cerebellar peduncle</li> </ul> </li> <li>• Boundaries, communications, recesses, choroid plexus and applied anatomy of fourth ventricle</li> <li>• Location, connections and functions of <ul style="list-style-type: none"> <li>▪ Red nucleus</li> <li>▪ Substantia nigra</li> </ul> </li> <li>• Location and components of <ul style="list-style-type: none"> <li>▪ Crus Cerebri</li> <li>▪ Auditory pathway</li> </ul> </li> <li>• Nuclei of origin, functional components, course and distribution of <ul style="list-style-type: none"> <li>▪ Oculomotor nerve</li> <li>▪ Trochlear nerve</li> </ul> </li> </ul>

**Diagrams to be drawn**

- T S of pons at trigeminal nucleus
- T S of midbrain at inferior colliculus
- T S of midbrain at superior colliculus
- Floor of fourth ventricle

**SESSION V–Cerebrum: Sulci, Gyri, Lobes and Functional areas**

<p style="text-align: center;"><b>Prosection</b></p> <ul style="list-style-type: none"> <li>• Median longitudinal fissure</li> <li>• Superolateral surface</li> <li>• Medial surface of cerebral hemisphere</li> <li>• Inferior surface</li> </ul> <p><b>Lobes (with boundaries)</b></p> <ul style="list-style-type: none"> <li>• Frontal lobe, parietal lobe, temporal lobe and occipital lobe</li> </ul> <p><b>Superolateral surface</b></p> <ul style="list-style-type: none"> <li>• Central sulcus</li> <li>• Precentral gyrus</li> <li>• Postcentral gyrus</li> <li>• Superior, middle &amp; inferior frontal gyri</li> <li>• Posterior ramus, ascending and horizontal rami of lateral sulcus</li> <li>• Pars orbitalis, pars triangularis &amp; pars opercularis</li> <li>• Insular cortex</li> <li>• Superior, middle &amp; inferior temporal gyri</li> <li>• Supramarginal and angular gyri</li> <li>• Parieto-occipital sulcus</li> <li>• Preoccipital notch</li> <li>• Intraparietal sulcus</li> <li>• Superior &amp; inferior parietal lobules</li> <li>• Lunate sulcus</li> </ul>	<p style="text-align: center;"><b>Medial surface</b></p> <ul style="list-style-type: none"> <li>• Corpus callosum – Rostrum, Genu, Trunk / body, Splenium</li> <li>• Callosal sulcus</li> <li>• Cingulate gyrus</li> <li>• Cingulate sulcus</li> <li>• Medial frontal gyrus</li> <li>• Paracentral lobule</li> <li>• Calcarine sulcus</li> <li>• Parieto-occipital sulcus</li> <li>• Cuneus</li> <li>• Precuneus</li> <li>• Paracentral lobule</li> <li>• Paraolfactory gyrus</li> <li>• Parahippocampal gyrus</li> <li>• Lamina terminalis</li> <li>• Optic chiasma</li> <li>• Ant. Commissure</li> <li>• Interventricular foramen of Monro</li> <li>• Thalamus</li> <li>• Hypothalamus</li> <li>• Hypothalamic sulcus</li> <li>• Interthalamic adhesion</li> <li>• Pineal body</li> <li>• Cerebral aqueduct</li> <li>• Fornix</li> <li>• Choroid fissure</li> </ul>
<p style="text-align: center;"><b>Inferior surface</b></p> <ul style="list-style-type: none"> <li>• Olfactory sulcus</li> <li>• Olfactory bulb</li> <li>• Olfactory tract</li> <li>• Olfactory trigone</li> <li>• Olfactory striae - medial and lateral</li> <li>• Gyrus rectus</li> <li>• Anterior, posterior, medial and lateral orbital gyri</li> <li>• Rhinal sulcus</li> <li>• Parahippocampal gyrus and uncus</li> <li>• Hippocampus and dentate gyrus</li> <li>• Medial &amp; lateral occipito-temporal gyri</li> <li>• Lingual gyrus</li> </ul>	<p style="text-align: center;"><b>Functional areas</b></p> <ul style="list-style-type: none"> <li>• Primary somatomotor area (Ms I)</li> <li>• Secondary somatomotor area (Ms II)</li> <li>• Primary somatosensory area (Sm I)</li> <li>• Secondary somatosensory area (Sm II)</li> <li>• Broca’s motor speech area</li> <li>• Wernicke’s sensory speech area</li> <li>• Primary auditory area (A I)</li> <li>• Auditory association area (A II)</li> <li>• Primary visual area (V I)</li> <li>• Visual association area (V II)</li> <li>• Higher association areas</li> </ul>

**Self-Study**

Boundaries, sulci and gyri, functional areas, connections, blood supply and applied anatomy of: Frontal lobe, Parietal lobe, Temporal lobe, Occipital lobe

**SESSION VI –Cerebrum: White Matter, Lateral Ventricle, III Ventricle**

<p style="text-align: center;"><b>Prosection</b></p> <p><b>White matter</b></p> <ul style="list-style-type: none"> <li>• Corpus callosum</li> <li>• Rostrum</li> <li>• Genu</li> <li>• Trunk</li> <li>• Splenium</li> <li>• Tapetum</li> <li>• Forceps minor</li> <li>• Forceps major</li> <li>• Anterior Commissure</li> <li>• Posterior Commissure</li> <li>• Habenular Commissure</li> <li>• Fornix and commissure of fornix (Hippocampal commissure)</li> <li>• Stria terminalis</li> <li>• Striahabenularis (Striamedullaris thalami)</li> <li>• Corona radiata</li> <li>• Internal capsule- Anterior limb, genu, posterior limb, retrolentiform part and sublentiform part</li> <li>• External capsule</li> <li>• Extreme capsule</li> </ul> <p><b>III ventricle</b></p> <ul style="list-style-type: none"> <li>• Roof</li> <li>• Floor- Infundibular &amp; optic recesses</li> <li>• Lateral wall</li> <li>• Anterior wall- lamina terminalis</li> <li>• Posterior wall- pineal &amp; suprapineal recesses</li> </ul>	<p><b>Lateral ventricle</b></p> <p><b>Anterior Horn</b></p> <ul style="list-style-type: none"> <li>• Septum pellucidum</li> <li>• Head of caudate nucleus</li> <li>• Genu of corpus callosum</li> </ul> <p><b>Body</b></p> <ul style="list-style-type: none"> <li>• Floor- thalamus, caudate nucleus, thalamostriate vein, stria terminalis, choroid plexus</li> <li>• Roof- trunk &amp; splenium of corpus callosum</li> </ul> <p><b>Posterior Horn</b></p> <ul style="list-style-type: none"> <li>• Medial wall- bulb of post. Horn &amp; calcar avis</li> <li>• Lateral wall- tapetum</li> </ul> <p><b>Inferior Horn</b></p> <ul style="list-style-type: none"> <li>• Collateral trigone</li> <li>• Roof- stria terminalis, tail of caudate nucleus</li> <li>• Floor- hippocampal eminence, pes hippocampi, collateral eminence, choroid fissure and plexus</li> </ul> <p style="text-align: center;"><b>Self study</b></p> <ul style="list-style-type: none"> <li>• Classification and definition of each type of white matter of cerebrum</li> <li>• Areas connected by various association bundles (short and long), commissural fibres and projection fibres</li> <li>• Parts, type of fibres, areas connected, functions and blood supply and applied anatomy of             <ul style="list-style-type: none"> <li>Internal capsule</li> <li>Corpus callosum</li> </ul> </li> <li>• Boundaries, communications, recesses, choroid plexus formation and applied anatomy of             <ul style="list-style-type: none"> <li>Third ventricle</li> <li>Lateral ventricle</li> </ul> </li> </ul>
--	---

**Diagrams to be drawn**

- Cerebrum – Sulci and gyri on superolateral, medial and inferior surface

**SESSION VII – Limbic System (the edge of hemisphere) and Basal nuclei**

Proseccion	Self-study
<p><b>Parts of limbic system</b></p> <ul style="list-style-type: none"> <li>➤ Olfactory tract</li> <li>➤ Olfactory trigone</li> <li>➤ Olfactory striae</li> <li>➤ Diagonal band of Broca</li> <li>➤ Piriform cortex - entorhinal area</li> <li>➤ Paraterminal gyrus</li> <li>➤ Indusium griseum</li> <li>➤ Gyrus fasciolaris</li> <li>➤ Cornu ammonis</li> <li>➤ Hippocampal gyrus</li> <li>➤ Dentate gyrus</li> <li>➤ Paraolfactory area</li> <li>➤ Cingulate gyrus</li> <li>➤ Isthmus</li> <li>➤ Parahippocampal gyrus</li> <li>➤ Fimbria, crura, body &amp; columns of fornix</li> <li>➤ Stria terminalis</li> <li>➤ Septal nuclei in septum pellucidum and in lamina terminalis</li> </ul> <p><b>Basal nuclei</b></p> <ul style="list-style-type: none"> <li>➤ Head, body, tail of caudate nucleus</li> <li>➤ Lentiform nucleus</li> <li>➤ Globus pallidus</li> <li>➤ Putamen</li> <li>➤ Amygdala</li> <li>➤ Claustrum</li> </ul>	<ul style="list-style-type: none"> <li>• Components and functions of limbic system</li> <li>• Olfactory pathway</li> <li>• Parts &amp; connections of fornix &amp; functions of hippocampus</li> <li>• Components, connections, functions, blood supply &amp; applied anatomy of corpus striatum / basal nuclei</li> </ul>

**Diagrams to be drawn**

- Horizontal section of cerebrum depicting basal nuclei and internal capsule
- Lateral ventricle of brain showing
  - Relations of anterior horn
  - Relations of body and inferior horn
  - Relations of posterior horn

**SESSION VIII–Nuclei and connections of thalamus and hypothalamus**

<b>Prosection</b>	<b>Self-study</b>
<p><b>Parts of diencephalon</b></p> <ul style="list-style-type: none"><li>• Dorsal thalamus</li><li>• Hypothalamus</li><li>• Epithalamus</li><li>• Metathalamus (medial &amp; lateral geniculate bodies)</li><li>• Subthalamus</li><li>• Optic chiasma</li><li>• Optic tracts</li><li>• Tuber cinereum</li><li>• Mamillary bodies</li><li>• Posterior perforated substance</li><li>• Pineal body</li><li>• Pineal stalk</li><li>• Habenular nucleus</li><li>• Habenular commissure</li><li>• Posterior commissure</li></ul>	<ul style="list-style-type: none"><li>• Visual pathway</li><li>• Nuclei, connections &amp; functions of<ul style="list-style-type: none"><li>▪ Thalamus</li><li>▪ Hypothalamus</li></ul></li></ul>

**Diagrams to be drawn**

- Visual pathway
- Auditory pathway
