

II MBBS subject Topic wise year planner (enter the broad topic (disease or system) - do not enter

Subject	Feb	Mar
Pharmacology		General Pharmacology Autonomic nervous system Chemotherapy
Pathology		Introduction to General Pathology Cell Injury and cell death introduction to Hematology Inflammation - Acute & chronic
Microbiology		General Microbiology Sterilization and Disinfection Infections causing Anemia
Community Medicine		Airborn Diseases
Forensic Medicine		General information Forensic pathology
Clinical subjects Medicine Surgery OB GY		Anatomy of the female reproductive tract
AETCOM		2.2

Pandemic module

Introduction emerging and re-emerging

ter individual lecture)

April

Autonomic nervous system

Cardiovascular system

May

Cardiovascular system

June

Chemotherapy

Repair

Anemia

Immunopathology

Hemodynamic system

Hemodynamic system co Pigment diseases

Cardiovascular system

Cellular adaptations

Neoplasia

Amyloidosis

Gastrointestinal system

Infections causing Anemia

Antimicrobial resistance

Immune system

Hand hygiene, Biomedical Waste

Pandemic module

Zoonotic diseases

Cardiovascular system

Oncogenic viruses

HIV

Vaccines

Pandemic module

Gastrointestinal system

Waterborn Diseases

Victorborn Diseases

Emerging & Reemerging Diseases

General information

Forensic pathology
